Coinbase

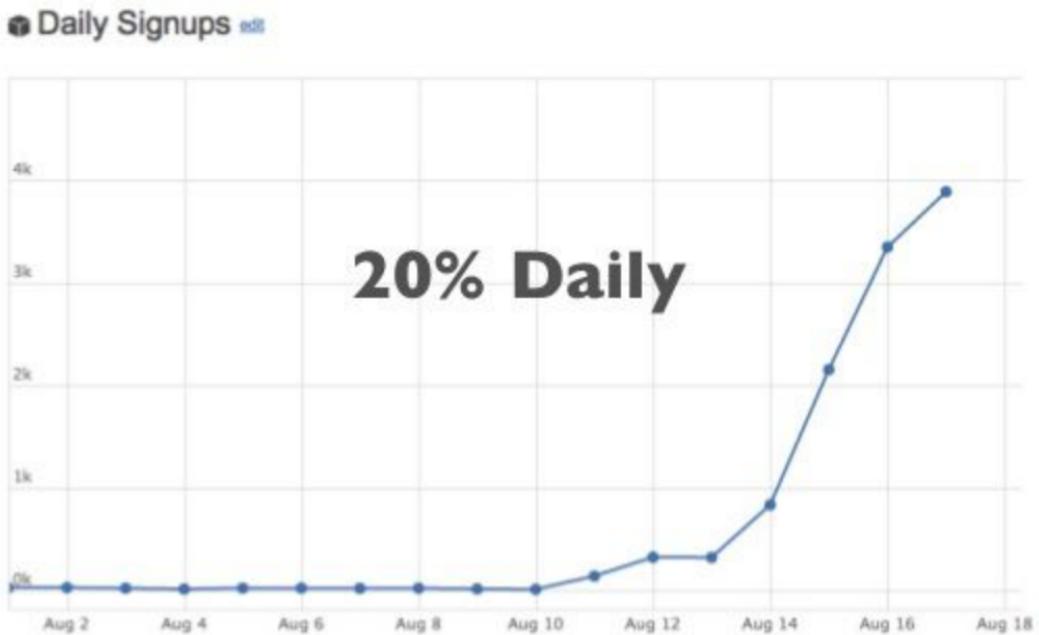

A composite image showing the Coinbase website on the left and the Coinbase mobile app on the right. Both interfaces show a similar layout with a top navigation bar, a sidebar with options like "Transactions", "Add or Withdraw", and "My Account", and a main table of transactions. The transactions listed are identical to the ones shown in the terminal screenshots above.

Coinbase: A Hosted Bitcoin Wallet

The image displays the Coinbase platform across two devices. On the left, a desktop browser window shows the Coinbase homepage with a balance of 42 BTC. The navigation bar includes links for Home, About, and Blog. The main content area features a sidebar with Transactions, Add or Withdraw, and My Account options. The central part of the page shows recent transactions, with a "Send Money" and "Request Money" button at the top right. On the right, an iPhone screen shows the Coinbase mobile application. The app's header includes a back arrow, a search icon, and a refresh icon. Below the header, there are three main menu items: Transactions, Add or Withdraw, and My Account. The Transactions section on the app screen shows a single transaction entry: "You sent money to johndoe@gmail.com". At the bottom of the app screen, there is a message: "You received money from Brian Armstrong". The overall layout is designed for both desktop and mobile users to manage their Bitcoin wallet.
